

Event-related special provision for exhibitors

Together with Messe Frankfurt, we are taking a series of measures that are seamlessly coordinated and enable the core of ACHEMA, personal contacts, to take place safely and promisingly, regardless of the further course of the pandemic.

Due to the current German Infection Protection Act (IfSG), health and safety measures are no longer obligatory for organizers since April 03, 2022. In the sense of a safe participation, we stick to protective measures and recommend all our participants to apply learned health and safety standards for their own protection and that of others. This includes, but is not limited to, recommending the situational wearing of mouth-nose protection in indoor areas. With symptoms of illness that could indicate a COVID-19 infection, please refrain from attending ACHEMA.

Support for our exhibitors in COVID-19 issues

Currently, there are no COVID-19-related special regulations for exhibitors in place. Nevertheless, we support our exhibitors in questions of stand design and operation regarding health and safety and will also advise on any adapted stand construction guidelines for stand design and operation in the future (standapproval@dechema.de).

- Observe the applicable rules of occupational health and safety.
- With a precautionary and regular self-test for the SARS-CoV-2 virus, you minimize the risk for yourself and others.
- The same applies to a coronavirus vaccination, which minimizes the risk of a severe course of the disease and the risk of infection for yourself and others.

Regardless of the omitted legal requirements, during the exhibition days we maintain the following safety and hygiene measures:

- **Air conditioning and ventilation**

An above-average air exchange rate (several complete exchanges of hall air per hour) as well as ventilation with the greatest possible proportion of fresh air is guaranteed throughout the venue.

- **Desinfection and cleaning**

Disinfectant dispensers are located throughout the exhibition grounds, especially at all entrances to the exhibition center and the entrances to the individual exhibition levels, as well as in the WC washrooms, at the catering outlets and in the restaurants. Contact areas and sanitary rooms as well as other frequently used areas are consistently cleaned and disinfected.

- **Crowd management/participant guidance**

Our service and security personnel keep an eye on the flow of attendees via a camera-based crowd management system and, if necessary, ensure that the density of people is professionally reduced. Optimized signage and routing also enable participants to find their way quickly and safely to their appointments and exhibition groups.

- **On-site medical care**

First-class on-site medical care is available at the Frankfurt exhibition grounds during ACHEMA.

You have questions about entry to Germany?

Please note, that entry to Germany is possible from all countries. For more information on entry and visas, please visit our Travel Information page <https://www.achema.de/en/for-visitors/travel-information> and our FAQs.
